Introduction

About Growing Up in Ireland

Growing Up in Ireland (GUI) is the national longitudinal study of children and youth in Ireland. It started in 2006 with two nationally representative cohorts of children: one aged 9 years (Cohort '98) and the other aged 9 months (Cohort '08) at the time of the first interview. The younger Cohort '08 participants (which are the subject of this report) were born between December 2007 and June 2008, and there were 11,134 completed cases in Wave 1. After the first interview at age 9 months, the same children and families were followed up at age 3, 5, 7/8, 9 and 13 years. Additionally, they were asked to complete a special COVID survey online in December 2020 when they would have been around 12 years old. Prior to this COVID survey, data collection took place primarily face-to-face in participants' homes.

At time of writing, a new Cohort '24 was due to commence in Autumn 2024 with a new group of infants aged 9 months.

About this document

This document contains the frequency tables from the Anonymised Microdata File version of the data file lodged in respect of the Primary Caregiver, Secondary Caregiver, Young Person and School Principal respondents to the Growing Up in Ireland survey for Wave 6 of Cohort '08 at 13 years that was conducted in July 2021 to June 2022. This was a fully remote survey, conducted using both online and telephone interviews. Most Young Person respondents were aged 13 years at the time. While the tables are organised according to the sequence of questions in the [Primary Caregiver Main Questionnaire](#), [Secondary Caregiver Main Questionnaire](#), [Young Person Main Questionnaire](#), [Primary Caregiver Self-Complete Questionnaire](#), [Secondary Caregiver Self-Complete Questionnaire](#), [Young Person Self-Complete Questionnaire](#) and the [School Principal's Questionnaire](#), note that the preparation of data for the AMF means that not all variables are included on that file, and some answer options are modified or combined for anonymisation purposes. Excluded or modified tables may be available to view in their original form on the 'Researcher Microdata File', for which applications should be made to the Central Statistics Office.

There were some Young People who were unable to complete a full interview (e.g. because of illness or disability). Some of these Young People instead completed a 'short' version of their main questionnaire (and no self-complete questionnaire). Another group of Young People had a partial version of the main questionnaire completed on their behalf by a parent (a 'proxy' questionnaire). This means that some variables relating to the Young Person questionnaires will have differing numbers of missing cases as not all questions were included on these alternative formats. The short and proxy versions of the questionnaire are available online [here](#).

The variables presented in this booklet have been weighted according to the appropriate cross-sectional weight on the AMF. The original AMF dataset and the accompanying technical documentation are available from the Irish Social Sciences Data Archive <https://www.ucd.ie/issda/data/guiinfant/guiinfantwave6/>

The design report outlining the procedures and rationale for this wave can be accessed at the following link: https://www.growingup.gov.ie/pubs/Cohort08_at_13_design_report_for_web.pdf.

A Note on How to Read the Tables

No Answer

Many questions will display the row “No answer” as observed in the table below:

Person 3 gender Wave 6 Grid					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Male	5702	85.7	89.5	89.5
	Female	672	10.1	10.5	100.0
	Total	6375	95.8	100.0	
No answer		280	4.2		
Total		6655	100.0		

This row covers respondents who refused to answer that question, didn't know how to answer or the question was not applicable. For the above question, it is likely that the majority of the “No answer” responses come from households with only a Primary Caregiver and a Young Person and no 3rd person.

Understanding the Different “Percent” Columns

Person 3 gender Wave 6 Grid					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Male	5702	85.7	89.5	89.5
	Female	672	10.1	10.5	100.0
	Total	6375	95.8	100.0	
No answer		280	4.2		
Total		6655	100.0		

The **percent** column displays each response category as a percentage of the total sample; in this case, only **95.8%** (6,375 participants) of the total sample (6,655 participants) answered the question and **4.2%** (280 participants) did not. The **valid percent** column displays each response category as a percentage of the participants that responded to the question (i.e., as a percentage of the 6,375 participants who answered “male” or “female”). The **cumulative percent** column displays a running sum of the valid percent.

Routing

Some questions are a result of routing, whereby they are only answered by participants who gave a certain answer on a preceding question. Not all routed questions are identified in the document, so if there is a large number of “No answer” responses for a question, it is possible that it is a result of routing and it would be advised to consult the questionnaire. An example below:

E9. During the last 12 months, about how many days was Study Child absent from school?					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	0 days	1035	15.5	15.6	15.6
	1 to 3 days	1912	28.7	28.9	44.6
	4 to 6 days	1280	19.2	19.4	63.9
	7 to 10 days	1017	15.3	15.4	79.3
	11 to 20 days	865	13.0	13.1	92.4
	More than 20 days	504	7.6	7.6	100.0
	Total	6614	99.4	100.0	
No answer	Count	41	.6		
Total		6655	100.0		

Note: The PCG was instructed to answer Question E10 if their answer to Question E9 was not “0 days”

E10. What was the MAIN reason for Study Child being absent from school?					
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Health reasons	3860	58.0	69.2	69.2
	A family vacation	126	1.9	2.3	71.5
	Refused to go to school	53	.8	1.0	72.4
	A fear of school / problem with teacher / problem with children at school	54	.8	1.0	73.4
	Family crisis	60	.9	1.1	74.5
	Quarantining, related to Covid-19	1128	16.9	20.2	94.7
	Other	296	4.5	5.3	100.0
	Total	5578	83.8	100.0	
No answer	Count	1077	16.2		
Total		6655	100.0		

As 1,035 participants answered “0 days” to question E9, they were instructed to skip question E10. The remaining 42 “No answer”s for Question E10 are likely made up mostly of

the 41 “No answer” responses highlighted in Question E9, who either missed the questions or declined to answer for some unknown reason.

Multiple Choice Questions

Some questions are multiple choice questions. In those instances, responses will be formatted as below, where the question (in this example Z2) will be displayed prior to any tables. The tables will then represent each response option, with a letter (example: Z2a, Z2b) for each option.

Z2. Thinking now of the most recent Level 5 restrictions when the schools were closed, please say whether each of the following was always true, sometimes true or not true for you. [TICK ALL THAT APPLY]

Z2a. My family did more activities together - during most recent level 5 restrictions					
		Frequency	Percent	Valid Percent	Cumulative Percent

	Sometimes true	2739	41.1	41.2	88.5
	Not true	767	11.5	11.5	100.0
	Total	6654	100.0	100.0	
No answer		1	.0		
Total		6655	100.0		

Z2b. It was difficult to balance work and family life - during most recent level 5 restrictions					
		Frequency	Percent	Valid Percent	Cumulative Percent

D. 13-Year-Old's Emotional Health and Well-being

Note: Question is D1 omitted from the AMF

D2. Here is a set of statements which could be used to describe <child's> behaviour. For each item, please indicate whether it is Not True, Somewhat True or Certainly True. It would help us if you answered all items as best you can even if you are not absolutely certain. Please give answers on the basis of <child's> behaviour over the last six months.

In the last 6 months has your child been?

Note: the individual SDQ items are not included on the AMF, but below are the tables for the scale subtotals and total difficulties score; median scores for each have also been calculated
